# CST your Link to Life named Automation Alley's 2010 Emerging Technology Company of the Year

ROCHESTER, MICH.—October 1, 2010—CST your Link to Life (CST) has been named Automation Alley's 2010 Emerging Technology Company of the year at their annual awards gala at the Royal Park Hotel in Rochester.

Jeffery Prough accepted the award stating, "Receiving any award, much less such an elite one is not just an acknowledgement of the company's success but an acknowledgment of the sum of the parts that make up our team."

CST is taking on an integral role in health care reform. Through in-home technology, seniors can safely age in place and patients can safely recuperate in their homes following a hospitalization, knowing that changes in their health status are being monitored 24/7 by our team of professionals. In the event a patient's condition worsens or they become symptomatic of complications, our Care Center will alert the appropriate health care provider to enable proactive intervention with the goal of avoiding unnecessary hospital readmissions.

Automation Alley was founded in 1999 to drive the growth of Southeast Michigan's technology-based companies and has grown to more than 1,000 members in eight counties. It drives the growth and image of the local economy through a collaborative culture that focuses on workforce and business development initiatives.

**About Critical Signal Technologies, Inc.**

Headquartered in Farmington Hills, Mich., Critical Signal Technologies (CST) is a leading provider of Personal Emergency Response Systems, medication management systems and TeleHealth solutions. Founded in 2006, privately-held CST operates fully redundant 24/7 Care Centers in Michigan and Massachusetts and serves individual and institutional clients throughout the United States and Puerto Rico.
