Secure Remote Monitoring of Vital Signs 24-7

BOB VSG is a Vital Signs Gateway, monitoring the critical information you need to know about your patient's health. BOB VSG gives peace of mind to your patient and establishes a higher standard of patient care for you as their healthcare provider.

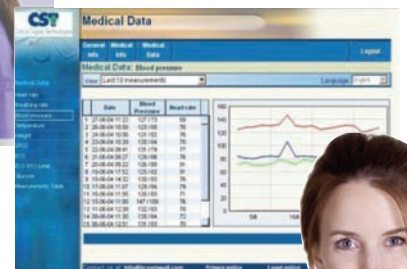

Designed to Be Easy for 'ou and 'our Patients

HERE'S HOW IT WORKS:

2 This data is transmitted to the **CST-LTL Care Center**, immediately alerting you to results outside of the predefined range you set. Based on your instructions and the patient's personal care plan, the Care Center can also alert other caregivers as needed.

1 **BOB VSG** receives signals from a wide array of TeleHealth devices you select based on your patient's health status. These devices are user friendly with proven and reliable RF transmission to the VSG unit.

3 All data is stored in a secure server, and the **CST-LTL e Viewer** gives you secure access to your patient's vital information anytime, day or night.

CST-LTL is a wireless network. CST-LTL products are equipped with backup power and supervisor features. CST-LTL's primary and backup Care Centers are fortified with state-of-the-art monitoring technology and are used in a secure, reliable, and efficient manner. CST-LTL's primary and backup Care Centers are fortified with state-of-the-art monitoring technology and are used in a secure, reliable, and efficient manner.

CST-LTL systems are recommended for patients who:

- Live alone or are by themselves for 3+ hours per day
- Have medical conditions that require frequent vital sign monitoring – like High Blood Pressure, Heart-related illness, Diabetes or other problems
- Have chronic conditions such as Osteoporosis, COPD, Kidney Failure, Parkinsons, Multiple Sclerosis or Incontinence
- Experience muscle weakness or mobility problems when walking or climbing stairs
- Have difficulty getting in or out of the tub, getting up or down stairs, etc.
- Get out of bed several times during the night to use the bathroom
- Take multiple medications or have complicated dosage instructions
- Have a history of falling or dizziness
- Want peace of mind about security, safety or health

If your patients or clients face these issues, it's time you recommend one of CST-LTL's lifesaving systems for TeleHealth, Medication Management and Personal Emergency Response. Our BOB VSG system provides remote monitoring, access to data and immediately alerts you to results outside of the parameters you pre-determine. All CST-LTL systems keep you and your patient connected 24/7 to the best Care Center Representatives in the industry.

About CST-LTL

CST-LTL brings advanced technology into the home, allowing the user to enjoy the freedom of independent living with the peace of mind that help is instantly available. **CST-LTL's** full line of personal emergency and medical response systems are easy to use, affordable and effective, helping to improve the health and safety of our users. Best of all, they are connected to the best Care Center in the industry, providing superior service and monitoring 24/7.

CST-LTL's products and services help support independence, prevent premature institutionalization, relieve isolation and improve quality of life.

- **CST-LTL's** Personal Emergency Response Systems (PERS) include 2-Way ClearVoice technology for instant conversation with our Care Center whenever needed. Our PERS systems can be programmed for pendant alerts, fall detection, security monitoring, environmental monitoring and many customized services to meet your patient's needs.
- **CST-LTL's** Medication Management Systems (MMS) organize and dispense medications on time, every time, and alert the patient and Care Center when dosages are missed.
- **CST-LTL's** Vital Signs Gateway (VSG) TeleHealth services help Clinicians and patients monitor and manage illness from the comfort of home.

At CST-LTL, we provide peace of mind at the press of a button.

Weight Scale

Panic Button

MMS (Medication Management)

Glucose Monitor

Wrist Clinic

Blood Pressure Monitor

CST-LTL Care Center

Even the best technology is only as good as the people who monitor it. Every **CST-LTL** Care Center Representative is CST-LTL-certified with extensive training in care service and emergency response. With the press of a button or signal from a CST-LTL unit, our Care Center Representatives are instantly in touch with the patient, and have immediate access to personalized client files with instructions for family or caregiver contact and appropriate emergency response.

CST-LTL's exclusive 2-Way ClearVoice technology provides crystal clear communication between the patient and Care Center even at longer distances or when the patient's speech may be compromised. This is more than just convenience – clear communication can save lives.

CST-LTL's Care Centers provide multi-lingual communication, fully redundant back-up systems and the most innovative technology in the industry. Combined with our exceptional staff and ClearVoice technology, CST-LTL Care Centers provide the most complete and reliable support services 24 hour a day, 7 days a week.
